All I simply downloaded today so they are usually all current versions From your listing, I've obtained Altholic, Prat, and MasterPlan all functioning just fine.. 01:20 PM Posted by I've by no means operate into an addon that doesn't function on a mac, therefore it's less likely that's your problem.

Are usually all of the addons for the present version of the sport? (Or have you checked the insert out of day addons key in the addon interface if you want to use out of time addons?) Which addons specifically are you getting issues with?
